

# Comprehensive Workplace Solutions

## Proposed Concept #3:

*Improve access to resources, services and information for our employers, the community and internal members.*

1. Create shared portfolio(s) of information, e.g., courses, programs, equipment and other resources, for employers and the community.
2. Develop repository of information for internal members of colleges and universities working in career services, foundation relations, customized training, continuing education, etc.

## What do YOU think?

- Do you agree with the concepts presented in our gallery walk for Comprehensive Workplace Solutions?
- In addition to what you have seen in the Gallery Walk, what is your definition of comprehensive workplace solutions? What would you change or add?
- Looking through the lens of employers and the community, how can we guide learners through their education and training to a career?
- What currently prevents us from achieving the goal to be the provider of choice for employers and the community?
- Would a one-stop solution for Comprehensive Workplace Solutions be possible? If yes, at what level (statewide, regional, institutional, etc.) and why?
- Do you perceive competition to be an issue?
