

# Education Technology Proposed Concept #1

***Enhance professional development and support for students, faculty, and staff.***

## **Current State**

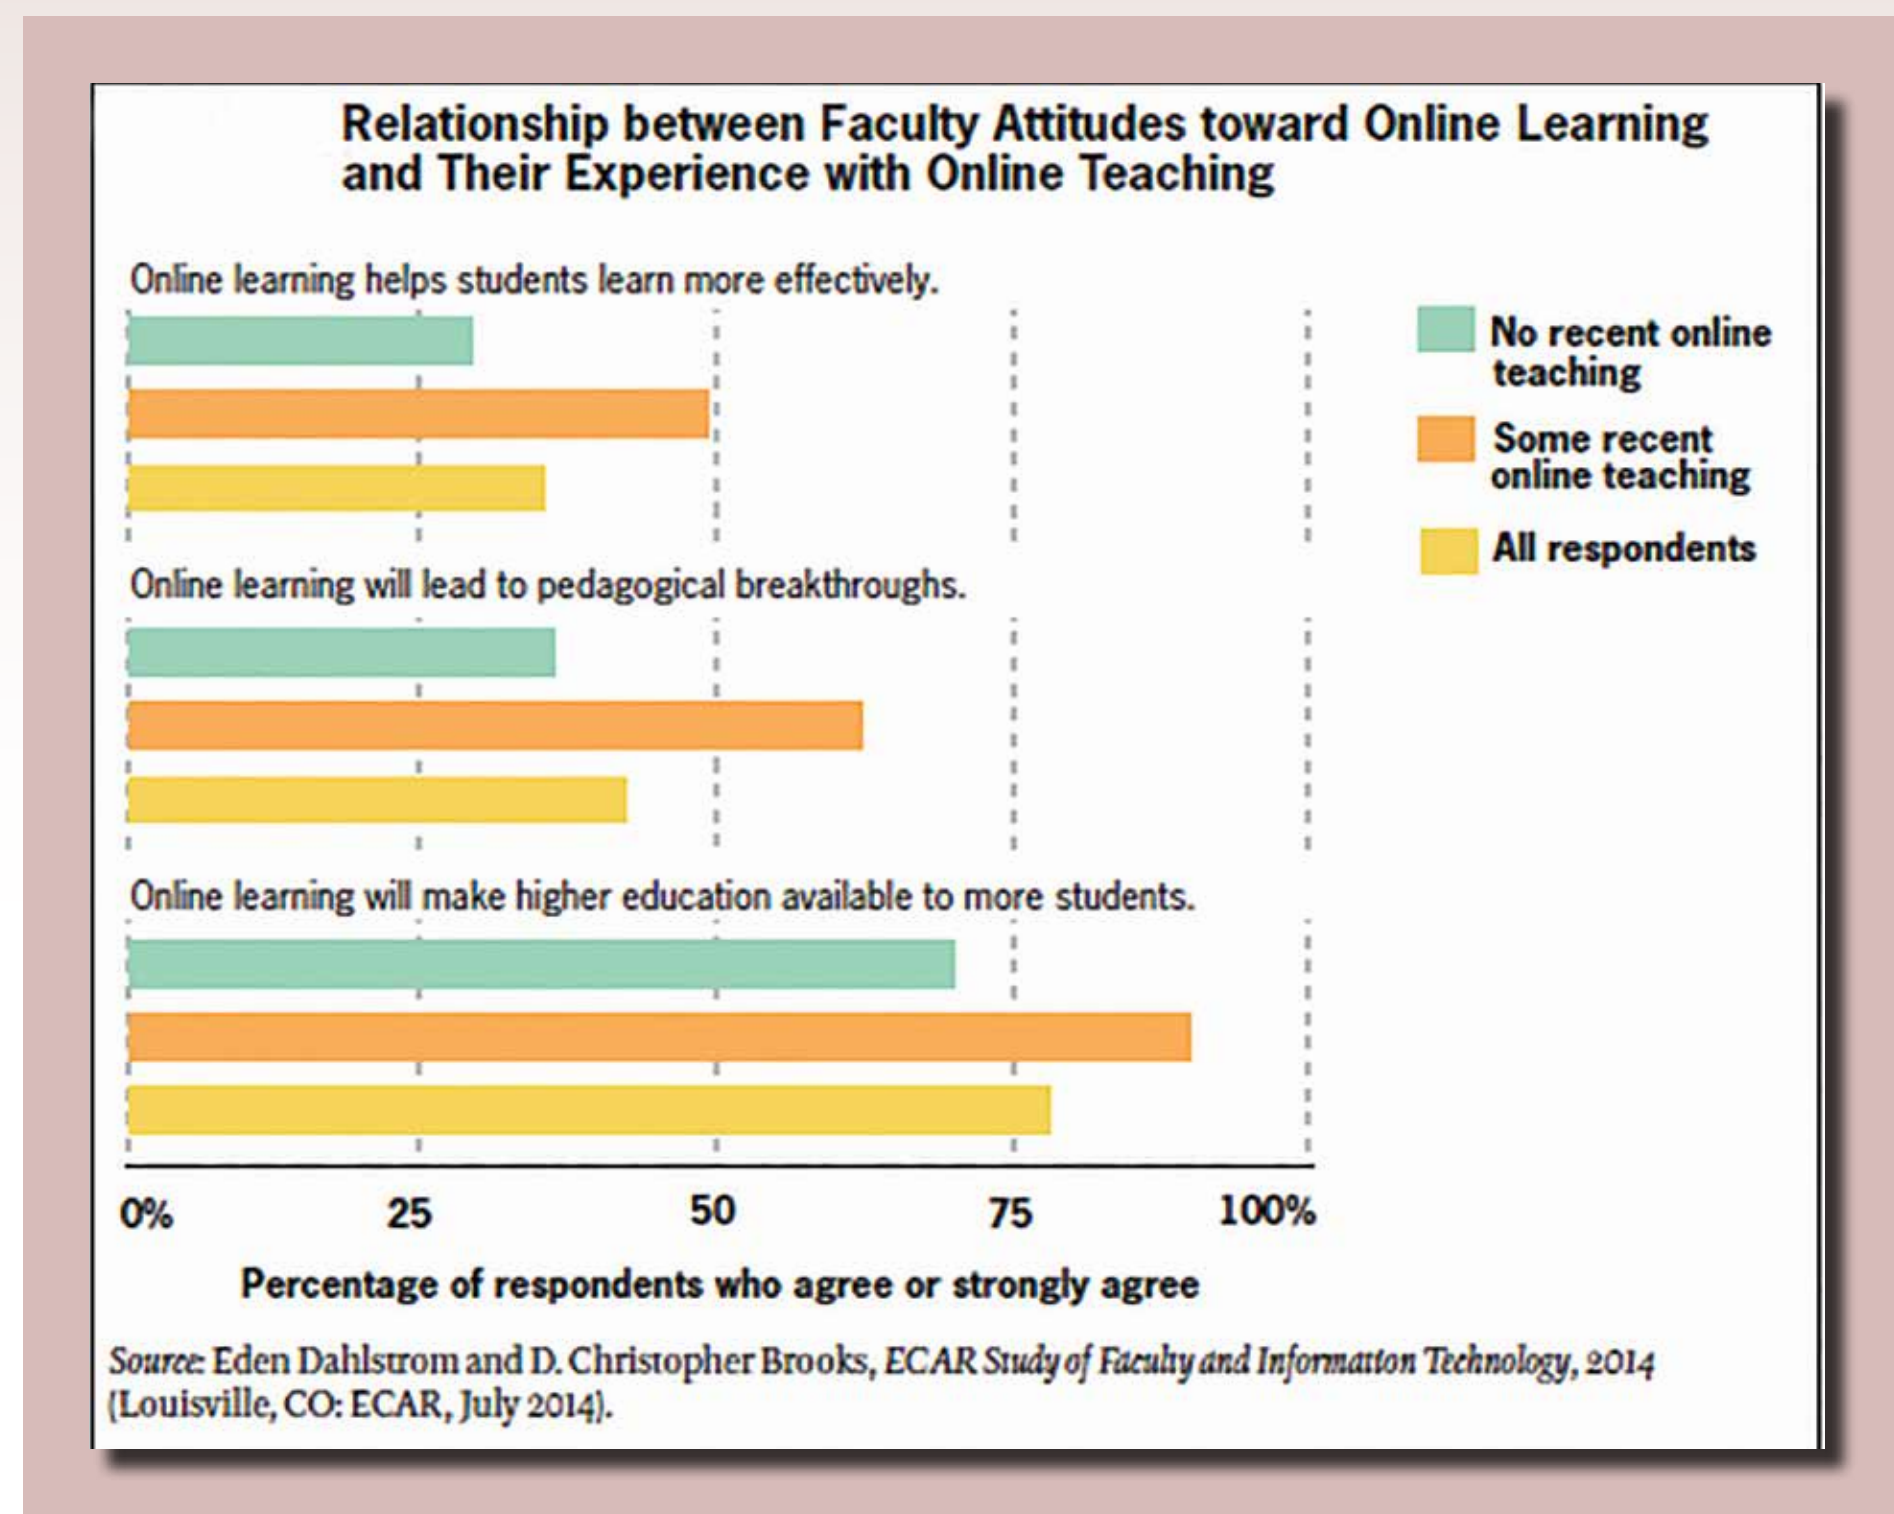

There is considerable disparity in the professional development opportunities and support resources available to campuses and users. The level of local expertise and available resources varies widely across campuses.

## **Desired Future State**

Technology users share best practices more widely across the system. Faculty and staff have the necessary resources and professional development to extend their reach to students. Instructional design expertise is shared among campuses. Technology support is available 24/7.

## **Benefit to Students, Faculty, Staff, and Beyond**

- Students use technology that is more fully integrated into the curriculum to enhance learning success.
- Faculty have instructional design support that allows multiple methodologies/pedagogies for delivering content and instruction in the most effective way possible.
- Staff benefit from productivity gains achieved by being more efficient across the system. All stakeholders have access to robust help desk support when using educational technology.

**CHARTING THE FUTURE**  
FOR A PROSPEROUS MINNESOTA

Minnesota State Colleges and Universities is an Equal Opportunity Employer and Educator.
